

GREEN SAHARA Farm

- Agriculture & Food Security
- Climate Action
- Biocircular Economy

| PROFILE |

A YEAR 2023 RENDITION

REVOLVE | RENEW | REJOICE

"Food and agriculture are at the center of many important issues facing us and the world we share today. Climate change, preserving natural resources and growing enough food to cater for our world are not only critical for today, but for the future.

As a company focused on agriculture, Green Sahara is committedly driving engagements in these larger endeavours on food, farming and the future."

DIKWA, Mohammed Suleiman
Chief Executive Office
Green Sahara Farms

Green Sahara is working to bring a broad range of green development solutions to sustain our growing world

While development is largely hinged on a people's prowess to harness resources and capital, agriculture is the bedrock upon which civilizations are built. Human Society must produce food upon which to be sustained or acquire it from those who produce it.

The greatest challenge is sustainably raising productivity to feed the world's ever-increasing population. This holistically requires the support of responsible climate-sensitive approaches that promote agricultural innovation and the facilitation of responsible investments.

There must be greater commitment to sound and efficient management practices, greater participatory production, improved training, extension and advocacy.

The barriers to sustainable production have to be brought into perspective and actively worked against.

...Creating a World-serving Agro-industrial and Green-based Heritage in Africa

3. Model

4. Programmes and Projects

4.1. Programmes

■ The Green Sahara Revolution

The Green Sahara Revolution was commissioned and initiated in 2015 as a proactive response to the lingering concerns of global issues which still uphold the severest ramifications in terms of local impact- climate change and environmental degradation, unemployment and poverty, diseases, food insecurity, poor living standards, and inequality.

Green Sahara has been working to bring a broad range of agricultural enhancement solutions to sustain the world.

Green Sahara is strategically aligning its overall endeavor towards attaining a Circular Bio-economy of Wellbeing in Nigeria in furtherance of realizing sustainable development outcomes

- **STRATEGIC GOALS**

- ✓ Develop innovative solutions which can actively reduce the environmental impact of modern life;
- ✓ Promote and enhance the sustainable use of resources with emphasis on land, water, food, energy, and biodiversity;
- ✓ Develop participative and all-inclusive enterprise models that provide local and community services, people empowerment and capacity development.
- ✓ Boost primary production across major industries;
- ✓ Address infrastructural deficits and the provision of social amenities and services.

■ Great Green Fields

The Great Green Fields of Green Sahara Revolution is dedicated to stimulating and helping producers to engage opportunities and build efficiencies to operate, conserve, and appropriately manage natural and agricultural resources with the supporting infrastructure to increase the productivity of lands; gaining leverage of economies of scale and obtaining better market value as well as social impact.

The Great Green Fields are specifically to help achieve the following:

- ✓ The creation of agricultural business models/operating mechanisms with high-performance capabilities to attract the required investments and resources for optimal benefits;
- ✓ The development of economies of scale, through the organizational efficiency of producers and value chain stakeholders;
- ✓ The efficient and effective use of natural and agricultural resources

The Great Green Fields is geared towards the commercial cultivation of economically viable agricultural produce by producers across all tiers through an inclusive approach while especially filling the gender gap, meeting the needs of women and empowering all people.

In order to spark sustainable development of the agricultural sector, the Green Sahara Revolution is helping farmers assume responsibility for their own development by adopting new principles, values, attitudes and behaviors that lead to a liberation of social energy, with synergistic results.

4.2. Projects

Operation Spicy Green:

focuses on the cultivation of economically viable, highly marketable and profitable spices and herbs

Green Grain Gains:

Facilitates the productivity boost in the value chain of various cereals and grains through enhancing efficiencies in sustainable production, processing and market expansion

Green Tree Thrift:

Adopts and espouses an economic approach to the planting of trees to optimize the performance of various sectors while driven on stimulating conscientious community participation; fostering the propagation of trees and promotion of agroforestry with a focus on enhancing local livelihoods and the conservation of biodiversity.

Green Roots Rescue:

Focuses on the sector productivity for local roots and tubers while delivering strategic interventions to scale up productivity and impact on all fronts, socio-cultural, economic and environmental

Agri-Green Value Chains:

Adopting the ideals of green agricultural practices across various commodity chain chains while building in traceability programming and helping to fix or modify value chains towards realizing sustainably enhanced productivity and global impact

5. Food Products and Dealerships

Organic Cereals, Grains and Pulses

9. Sustainability

Green Sahara has swiftly committed to conducting operations in a way that promotes environmental protection, social responsibility, and good governance practices while promoting sustainable farming practices, reducing greenhouse gas emissions, conserving natural resources, promoting social welfare, and implementing transparent governance structures

ESG

Green Sahara is prioritizing green supply chains throughout the entirety of its agricultural works.

With keen transformations to limited resource use while promoting adoption of sustainable and biodegradable materials, use of renewable energy sources, and suiting in recycling to its flows.

We are building on precision to optimize fertilizer and water use within local contexts while implementing agroforestry practices to reduce erosion, improve soil health and provide alternative income streams.

INCLUSION

Green Sahara is partnering with local communities to develop sustainable agricultural practices and empower local people.

We are helping to establish social and economic linkages with a view to boosting productivity and enhancing broad sustainable development.

10. Resourcing

Green Sahara is growing on an enduring base of resources specially being pooled to stimulate enterprise diversity and boost performance efficiencies.

- ✔ Diverse product portfolio with competitive hold to render uniquely tailored value
- ✔ Integrated operating mechanism with effective performance responses and controls
- ✔ System proficiencies built with buffers in partnerships and support services
- ✔ An international company with extensive local coverage ensuring the broadest functional reach
- ✔ Keenly robust network and systems functionalities
